

Preliminary Action Items Related to Professional Societies

- Convene society representatives by conference call in ~ one month as nascent Coordinating Committee, invite other societies
- Collect current approaches and develop and disseminate consensus best practices on:
 1. Pharmacogenomics
 2. DTC testing
 3. Judging when state of science is nearing the clinical horizon
 4. Competencies vs general knowledge

Preliminary Action Items Related to Professional Societies

- Send to Gene P:
 1. Links for available physician education materials for posting in G2C2
 2. Individual societies' areas of interest
 3. Process for developing guidelines and pseudo-guidelines
 4. Current approaches and best practices

Preliminary Action Items Related to Professional Societies

- Produce white paper from this meeting, include surveys or publish surveys separately
- Develop working group to address liability issues presented by GM implementation
- Convene societies' guideline producers to outline process and evidence needs (GM VII?)
- Engage disease-specific Institutes more actively in collaborative efforts with societies
