

# American College of Clinical Pharmacy (ACCP)

Christina Aquilante, Pharm.D., FCCP

Associate Professor, University of Colorado School of Pharmacy

Samuel Johnson, Pharm.D., BCPS, FCCP

Director, Health Policy and Interprofessional Affairs, ACCP

# Type of organization

- ACCP is a professional and scientific society that provides leadership, education, advocacy, and resources enabling clinical pharmacists to achieve excellence in practice and research
- ACCP is the professional home for more than 17,000 clinical pharmacy practitioners, scientists, educators, administrators, students, residents, and fellows from more than 60 countries committed to excellence in clinical pharmacy and patient pharmacotherapy

# We are just starting to address provider genomic literacy – here’s how we prioritize

Program goals	<b>Adopt interprofessional approach to education, training, practice, and research</b>
Context of genomics in specialty area	Focus on pharmacogenomics
Mission-based limitations (e.g. Board or charter emphasizes education without genetics/genomics component)	Broad mission focused on developing, advancing, and positioning clinical pharmacists; incorporating genomic literacy clearly aligns
Financial limitations	The “usual” concerns 😊
Staff limitations	None, staff are fully engaged
Engagement experience	Broad, encompassing policy, practice, education, and research
Timeline for shifting to active role	6-12 months
Requests for assistance/collaboration: resources, curricula, advisors, mentors	Open to all!
Requests for RESEARCH programs	ACCP Research Institute, Practice-based Research Network
