

NHGRI International Genomics Education Meeting

August 4-5, 2016
National Institutes of Health
Bethesda, Maryland
USA

Welcome!

Objectives

- Provide an overview of primary care oriented education programs (but open to all audiences)
- Review lessons learned for meeting the changing educational needs of healthcare providers
- Share best practices for genomics education implementation
- Identify synergies, challenges, and opportunities to share and collaborate
- Focus on physicians and healthcare practitioners (clinicians, nurses, pharmacists, genetic counselors, and physician assistants)

Anticipated Meeting Outcomes

- Awareness of the landscape for international genomics education
- Identification of synergies and opportunities for collaboration
- Developing an agenda for the ISCC International Education Workgroup to pursue
- Potential publication of meeting summary?

Questions/Comments
